27 repos checked · 36 releases · Last run 12 Oct 2026, 17:07 (Asia/Kolkata) · ~4 min read

THIS WEEK AT A GLANCE

Express v5.3.0 requires immediate action because it fixes CVE-2026-2391 and resolves Content-Length/Transfer-Encoding conflicts. Across 27 checked repositories and 36 releases, 1 item requires immediate action, 4 require review, and 18 are FYI. Zero repositories could not be checked.

1. Check whether your pinned version of expressjs/express is below v5.3.0, and upgrade if it is.
2. Read the migration notes for v8.0.0-rc.17 before upgrading prisma/orm, and keep your current range pinned until call sites are checked.
3. Treat v5.0.0-rc.0 as a major upgrade: review the release notes before widening your version range.

Written by Gemini Flash using only the items below, and checked for invented versions or IDs.

TIER 1

Act now

Security fixes and urgent upgrades. Check the quoted evidence, then act.

Act now · Security fix · 9 Oct

EX **expressjs/express** `v5.3.0`

Platform · normal priority

Express v5.3.0 fixes security vulnerabilities in dependencies, resolves Content-Length/Transfer-Encoding conflicts, and adds QUERY request revalidation.

> Upgrade qs to ^6.16.0, which fixes CVE-2026-2391 (GHSA-w7fw-mjwx-w883), CVE-2026-82417 (GHSA-4mjr-xmp4-gh2g) and CVE-2026-82562 (GHSA-x5fp-wj9c-mxmx): arrayLimit bypasses in comma parsing and a denia…

From the release notes, verbatim

Why flagged: The notes say “fixes CVE-2026-2391” (affects HTTP handling and dependencies).

→ **Next step:** Check whether your pinned version of expressjs/express is below v5.3.0, and upgrade if it is.

Key changes (4) and source

- Upgrade qs, proxy-addr, and body-parser dependencies to fix multiple security vulnerabilities (CVEs)
- Prevent Content-Length and Transfer-Encoding header conflicts in res.send()
- Allow conditional freshness revalidation for QUERY requests in req.fresh
- Upgrade content-type, content-disposition, and enhance default error handler logging

Area: HTTP handling and dependencies · Confidence: high · Summary: Gemini Flash, checked against the notes

TIER 2

Review

Breaking changes, major version bumps, and items worth a closer look before your next upgrade.

Review | Breaking change | Pre-release — 8 Oct

PR **prisma/orm** `v8.0.0-rc.17`

Data · normal priority

Prisma v8.0.0-rc.17 introduces stricter migration data loss consent, row locking in the ORM client, query fragments, and updated enum value handling.

> --confirm no longer consents to data loss. prisma migration plan and prisma db update ask one question for each model, field or table a plan would lose data from, before they write or apply anything.…

From the release notes, verbatim

Why flagged: The notes say “--confirm no longer consents to data loss.”.

→ **Next step:** Read the migration notes for v8.0.0-rc.17 before upgrading prisma/orm, and keep your current range pinned until call sites are checked.

2 MORE FLAGGED RELEASES OF PRISMA/ORM THIS WEEK

`v8.0.0-rc.16` Pre-release 7 Oct

Notes (https://github.com/prisma/orm/releases/tag/v8.0.0-rc.16)

Prisma v8.0.0-rc.16 updates @prisma/cli-engine to 0.6.3 to resolve ArkType conflicts, improves @default diagnostics, and updates extension internal APIs.

The notes say “The toolchain requires `@prisma/cli-engine` 0.6.3.”.

`v8.0.0-rc.15` Pre-release 7 Oct

Notes (https://github.com/prisma/orm/releases/tag/v8.0.0-rc.15)

Prisma v8.0.0-rc.15 updates SQL contracts to use data type IDs, enhances codec validation, refines collection writes, and updates cache middleware.

The notes say “Each breaking change below names the change id to look for in them.”.

Key changes (4) and source

- --confirm no longer consents to data loss; explicit --delete or --rename flags are required during migrations and db updates.
- Added ORM collection row locking with forUpdate(), forNoKeyUpdate(), forShare(), and forKeyShare().
- Renamed collection methods apply to with, and scope to fragment in the SQL ORM client.
- db.enums now holds each member as read from the database, matching returned query values.

Area: migrations & ORM client · Confidence: high · Summary: Gemini Flash, checked against the notes

Review Major version bump Pre-release 8 Oct

HO **honojs/hono** `v5.0.0-rc.0`

Evaluation · low priority

No release notes published.

Why flagged: The version moves from v4 to v5, a major version bump.

→ **Next step:** Treat v5.0.0-rc.0 as a major upgrade: review the release notes before widening your version range.

Key changes and source

No release notes published.

Area: not stated · Confidence: high · Summary: first lines of the notes

FYI

Everything else that shipped, grouped by the part of the product it touches.

Payments

5 repos checked · 4 releases

CH **checkout/checkout-sdk-node** `5.7.0` — 8 Oct

Added Cash App Pay and enhanced customer information support to the Payment Setups API, including JSDoc documentation updates and integration tests.
Notes (https://github.com/checkout/checkout-sdk-node/releases/tag/5.7.0)

CH **checkout/checkout-sdk-node** `5.6.0` — 6 Oct

Release 5.6.0 improves documentation and test coverage for the Platforms API integration, focusing on sub-entities and identity document uploads.
Notes (https://github.com/checkout/checkout-sdk-node/releases/tag/5.6.0)

CH **checkout/checkout-sdk-node** `5.5.0` — 5 Oct

Updated documentation and test cases to align airline and accommodation sub-tree models across payment API endpoints.
Notes (https://github.com/checkout/checkout-sdk-node/releases/tag/5.5.0)

ST **stripe/stripe-node** `v23.1.0-alpha.2` — 8 Oct

Pre-release · Low confidence, verify before acting

v23.1.0-alpha.2 release notes refer to an external changelog without details.
Notes (https://github.com/stripe/stripe-node/releases/tag/v23.1.0-alpha.2)

Banking

4 repos checked · 1 release

MO **moov-io/ach** `v1.64.0` — 8 Oct

Added original control totals validation to achcli, updated CTX/ATX/TRX reply addenda checks, and enforced FileCreationTime hour ranges.
Notes (https://github.com/moov-io/ach/releases/tag/v1.64.0)

Platform

4 repos checked · 16 releases

NO **nodejs/node** `v26.11.1` — 8 Oct

Node.js v26.11.1 reverts three recent commits concerning build tooling, doc-kit, and doc redesign. Notes (https://github.com/nodejs/node/releases/tag/v26.11.1)

NO **nodejs/node** `v26.11.0` — 7 Oct

Node.js v26.11.0 introduces new buffer and HTTP validation APIs, perf_hooks updates, and sqlite class renames.
Notes (https://github.com/nodejs/node/releases/tag/v26.11.0)

VE **vercel/next.js** `v16.5.0-canary.8` 11 Oct

Pre-release

Fixes server error inspector stack parsing, enables webp and canary GC by default, and fixes Turbopack GC paths.
Notes (https://github.com/vercel/next.js/releases/tag/v16.5.0-canary.8)

VE **vercel/next.js** `v16.5.0-canary.7` 10 Oct

Pre-release

Relands experimental custom webpack support alongside Turbopack improvements and dependency upgrades.
Notes (https://github.com/vercel/next.js/releases/tag/v16.5.0-canary.7)

VE **vercel/next.js** `v16.5.0-canary.6` 9 Oct

Pre-release

Next.js canary release featuring Turbopack improvements, build optimizations, route classification fixes, and a React upgrade.
Notes (https://github.com/vercel/next.js/releases/tag/v16.5.0-canary.6)

+10 earlier releases of vercel/next.js

`v16.5.0-canary.5, v16.5.0-canary.4, v16.5.0-canary.3, v16.5.0-canary.2, v16.5.0-canary.1, v16.4.0-canary.63, v16.4.0-canary.62, v16.4.0-canary.61, v16.4.0, v16.5.0-canary.0`

Data

4 repos checked · 5 releases

CO **colinhacks/zod** `v4.6.6` 11 Oct

Zod v4.6.6 includes bug fixes, performance improvements, type declarations for records, and size bounds checks prior to parsing elements.
Notes (https://github.com/colinhacks/zod/releases/tag/v4.6.6)

DR **drizzle-team/drizzle-orm** `0.45.4` 8 Oct

Fixed postgres-js not using prepared queries when explicitly calling .prepare(name).
Notes (https://github.com/drizzle-team/drizzle-orm/releases/tag/0.45.4)

Evaluation

3 repos checked · 10 releases

HO **honojs/hono** `v5.0.0-rc.1` 10 Oct

Pre-release

No release notes published.
Notes (https://github.com/honojs/hono/releases/tag/v5.0.0-rc.1)

HO **honojs/hono** `@hono/vercel@1.0.1` 8 Oct

Updated peer dependencies to accept Hono v5 prereleases and kept internal types private in bundled d.ts.
Notes (https://github.com/honojs/hono/releases/tag/%40hono/vercel%401.0.1)

HO

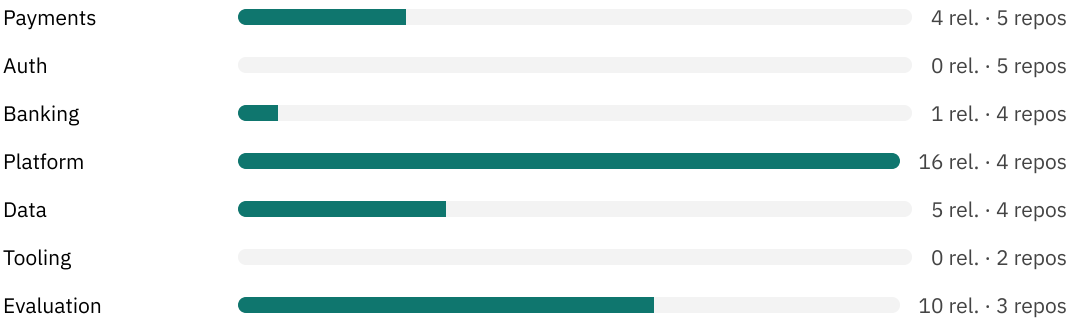

honojs/hono `@hono/service-worker@1.0.1` 8 Oct

Accept Hono v5 prereleases in the hono peer range, so npm install with hono@next no longer fails with ERESOLVE by @yusukebe in https://github.com/honojs/hono/p… Also in @hono/netlify@1.0.2, @hono/lambda-edge@1.0.1, @hono/deno@1.0.3, @hono/cloudflare-workers@1.0.1, @hono/bun@1.0.1, @hono/aws-lambda@1.0.1.
Notes (https://github.com/honojs/hono/releases/tag/%40hono/service-worker%401.0.1)
